Green Flag	Lightweight polyester
	Large white CP printed on flag
Poles	10-foot sectional aluminum poles
Magnets	Powerful ring magnets are encased in plated steel cups
	Magnets are covered with protective vinyl to prevent scratching
Weight	2 lbs

- A 10-foot sectional aluminum pole with shock cord quickly snaps together to display the green Command Post Flag and green Light at a height easily seen over other vehicles and apparatus.
- The pole attaches to any metal surface – like the side of the vehicle – with two super-strong magnets that hold the Flag/Light upright. No need to drill holes into the vehicle to mount hardware. The magnetic bases are covered with protective vinyl.
- Two unique, pyramid-shaped green Lightman® LED lights, mounted on the top of the flag pole, provide a full 360 degrees of visibility in either flash or steady-on mode. Battery-powered by two AA batteries, the lights can be seen up to two miles away.
- The large green Flag with white “CP” lettering not only identifies the post but also establishes wind direction.
- Pole, Light and Flag stow away in their own green stuff bag for easy access in vehicle or toolbox.

We use the finest quality materials and USA craftsmanship to manufacture the very best Bumperchute products. Importantly, we offer a 100% money back guarantee against manufacturing defects.
