

MEET THE CHALLENGES at the COMMAND POST

Bumperchute Command Post

Model FR BT (single rear liftgate)

The BT model extends almost three feet beyond the opened liftgate to provide additional overhead protection. Side panel windows have interior flaps which can be open for visibility or closed for shade.

CP

Command Post Flag/Light

Ten-foot sectional aluminum pole attaches to any metal surface. Two green LED lights provide a full 360 degrees of visibility. Green flag identifies the command post and wind direction.

ZipR Shield

The ZipR Shield™ encloses the front opening of the Bumperchute to provide privacy and additional protection from the weather. The center opening is edged in velcro for easy closure, allowing personnel ready access in or out.

Brow Cover

The brow cover hides the pre-printed "Command Post" to allow the the user to customize the vehicle identification by sliding in a different title, e.g. "Operations" or "HAZMAT".
